

## § 70.39

(h) The term *non-commercial scientific institute* means an institution that is not operated on a *commercial* basis as that term is defined in § 70.38(f), and that is operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any particular product or industry.

(i) The term *representative of the news media* means any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. Factors indicating such representation status include press accreditation, guild membership, a history of continuing publication, business registration, and/or Federal Communication Commission licensing, among others. For purpose of this definition the term *news* contemplates information that is about current events or that would be of current interest to the public. A freelance journalist shall be treated as a representative of the news media if the person can demonstrate a solid basis for expecting publication of matters related to the requested information through a qualifying news media entity. A publication contract with a qualifying news media entity satisfies this requirement. An individual's past publication record with organizations of the foregoing nature is also relevant to this determination. Examples of news media entities include:

- (1) Television or radio stations broadcasting to the public at large, and
- (2) Publishers of periodicals including newsletters (but only in those instances where they can qualify as disseminators of news) who make their products available for purchase or subscription by the general public.
